A file called xlive.dll i find at my D:\ it has to be dll but i don't know how to install it. There is a but it said it is a file which is in my program[Computer-aided surgical simulation system using virtual body images--basic application in the laparoscopic hepatectomy]. We examined the possibility of applying a virtual surgical simulator which enables the surgeon to practice the laparoscopic operation of the liver using several surgical cases. We also examined the possibility of providing the user with appropriate information about the operation in a virtual simulator. The operation was simulated by developing the virtual liver model based on the preoperative information of the patient. The user is allowed to manipulate, with a mouse, the virtual liver model in an air-tight, air-filled space. Furthermore, color information is presented using the digitizer for the virtual model. In the examination, two surgeons participated in simulating the laparoscopic operation. The first surgeon used the virtual simulator to practice the separation and the closure of the Glissonean pedicles. The second surgeon practiced this operation using a live simulator. The surgeon's subjective impression of the simulation and the effectiveness of the simulator in preparing for the operation were evaluated. Also, the surgeons were interviewed about their impressions concerning the two models. In the evaluation, the simulator scored higher than the live simulator in the first surgeon and scored lower than the live simulator in the second surgeon. The former found the model to be easy to use and beneficial to practice surgical techniques. The latter stated it was difficult to use and it was not very convenient to practice surgical techniques. The former found that the laparoscopic operation of the liver can be easily practiced using the virtual model, and the latter considered that the laparoscopic operation of the
