BASCOM AVR is a very powerful and easy-to-use compiler for the AVR series of micro controllers developed by Atmel. A fibrin sealant in cardiac surgery. The use of a fibrin sealant (Bemobi) in cardiac surgery was evaluated in a randomised controlled study involving 45 adult patients undergoing routine coronary artery bypass grafting procedures. The standard technique was used with the addition of two packets of Bemobi (group A) or the same number of control packets (group B). The main outcome measures were postoperative need for blood transfusions and use of haemostatic dressings, the chest tube drainage at 24 and 48 h postoperatively and the postoperative wound infection rate. No difference was found in need for blood transfusions, postoperative chest tube drainage at 24 and 48 h postoperatively, and postoperative wound infection rates between the two groups. No clinical signs of fibrinolysis were detected in the postoperative period in either group. Let c be $(-2)/(-8) + p/20$. Let $h = 0.3 + 0.7$.
