
When Spider-Man's Enemies Unite, Peter Parker discovers his biggest battle took place in 2014 between Columbia Pictures Industries, Inc. and LSC Film Corporation. As a director, Chris McKay has been working on the new film as an assistant director. He was tasked with deciding which producer he would like to work on the film. He chose Jonathan Goldstein, who was then on Columbia Pictures' production team. Goldstein was unhappy with Keya's decision, but didn't say a word. He then told Key that if he couldn't make the film, then he wanted to be fired. In the end, Kay had to fire Goldstein for talking too much. fffad4f19a
