The player, a young man named Luke, is sent to live with his uncle after his parents die during a plague outbreak. He later finds out that his uncle is actually his grandfather, and he sets out to find the reason why his parents died, the village, and his grandparents. Through farming, he makes the village grow bigger and more populous, eventually joining the World Tour and World Championship Farmer tournament, while also getting in contact with other villagers. Game Features: The game takes place in a 2D side-scrolling game world. One of the game's features is its extensive and varied dialogue tree system, which the player must use to negotiate with the villagers and other characters. Players can purchase items with the money they earn through their farming to customize their characters, houses, animals, and other aspects of the game. Players have to interact with the environment as well; for example, a baby piglet needs to be raised. On May 31, 2020, a total of 59 million copies of the game had been sold worldwide.
