Apr 8, 2020 Acronis True Image Home 2013 16.0 Build 6514. Microsoft Windows [Version 10.0.14393]

1. Media Builder: Your bootable media includes full backup tools.... Download Acronis True Image Home 2013 16.0 Build 6514 setup free media builder.. At the end of the build process, check for errors.... So what is the difference between the two versions and why is the Acronis home edition build 6514 not working? A: This is my solution which worked for me. Download the *.iso file from the official site which is (at the time of writing this) Unzip the file (just open the folder in windows explorer), the build product will be created. (True Image is installed in the folder C:\Program Files\True Image Home 2013\) Start the product and when prompted choose your language and country, accept the EULA and the installer will begin downloading the files. (I did not have to accept any additional licenses as this was the True Image Home 2013 EULA that was downloaded by the installer) When the final stage of installation begins, the media builder product starts and shows an error message on the screen "An error occurred during execution of Windows Image Builder. Please try to run Windows Image Builder again." When you start Windows Image Builder it will run and then stop with a message saying the following: "Could not verify the integrity of the Windows Image Builder installer. The Windows Image Builder installer was successfully installed to the target location. The Windows Image Builder installer was not successfully removed from the target location. This may have been caused by an external problem such as a software malfunction or antivirus blocking the installer. To verify the installer, try to run Windows Image Builder again. Windows Image Builder product: Acronis Rescue CD Setup DVD The solution is to close Windows Image Builder, then start the product and manually unblock the installer using the command (This is a.bat file so you will need to open the file in a text editor and change the path to point to the correct location): regsvr32 /u "%SystemRoot%\system32\imagehelper.dll" regsvr32 /u "%SystemRoot%\system32\ddexpcd.dll" When I tried to unblock the installer using the system tray 2d92ce491b
