Posted on October 2, 2016 Actor Jean-Michel Couette has died at the age of 81, his family said on Monday. The French actor, who first made his name in films as a supporting character actor and as an occasional lead, died after a long illness, said his representative. He was the father of French actor Jean-Pierre Couette. I've always liked Jean-Michel Couette because he was an actor who was always very professional but also very personal. I love his character in "Au Revoir les enfants," and it's really a shame that he's no longer around. RIP.Q: Seeking information on the following game A ball is tossed to a man who can never be more than 1 metre away from it. He is allowed to throw the ball as high as he wants, he can use his hands or feet but he can't kick the ball. It takes an infinite amount of throws for the ball to reach its target. What is the expected value of his throws? A: If we assume throwing to the target is a fair coin toss, the answer is: $\frac{1}{\frac{3}{2} + \frac{1}{2} + \frac{1}{2}} = \frac{2}{5}$ Q: Write a stored procedure using LINQ syntax I have a project called MyProject. The project was created using the VS2008 template from the "Empty Class Library", I need to create a stored procedure which retrieves data from an MS SQL Server database. I have created the table in the database and I would like to create a stored procedure to do the following: SELECT COUNT(*) FROM MyTable I can do this using the following: var CountQuery = "SELECT COUNT(*) FROM MyTable"; using (var context = new MyContext()) { var count = context.Database.SqlQuery(CountQuery).ToArray(); } How can I do this using LINQ syntax? You could use: var count = context.Database.SqlQuery("SELECT COUNT(*) FROM MyTable", new [] { context.Database.Connection.CreateCommand() }).FirstOrDefault(); or:
