Science Famous Scottish scientist tells world about his work Share this story SEATTLE - Brian Boyle, the founder of Science Education and Science for Everyone is a local scientist, scientist, and inspiration. He travels the world speaking about his work and inspiring others to pursue a career in science. Many people know him from his work with the Puget Sound Science Festival and the Make it Science Festival. He has worked with the United Nations and has taken his work to Africa and the United Kingdom. He was just back from an inspiring tour of the United Kingdom. "I'm excited to be doing my work again, we're planning for another tour of the UK in 2016. It's fun, it's exciting, it's healthy to work hard and to be creative," says Boyle. "I'm an enthusiastic speaker who tells people about my work and why it's important," says Boyle. He was honored with the Gordon E. Moore Distinguished Achievement Award from the Silicon Valley Section of the American Chemical Society. The award honors individuals who have "made outstanding contributions to science, engineering, education and other endeavors within the Silicon Valley community." "I want to encourage more people to get into science and into education, I hope it encourages more people to see science as a really fun place to be," says Boyle. Science Education in Vancouver this week. Boyle will speak there this afternoon about the same things he's always talking about: how to get involved with science and how to find your career. "The Make it Science Festival," he says, is a weekend of science and it's a day of fun.

This year, the science festivals have a new focus, this year's theme is, "Making science fun."Q: Aggregating data and adding the result as field to the current field My dataset is like this: id 2d92ce491b
