- System restore: restore your system to a previous state
- Help and information: program's help and information
- Full functionality: no limit in functional set

dbxtra 2012 Wednesday, May 16, 2012 Why You Should Use MySQL, Not Oracle? TheOracle.com claimed that the Oracle Corporation... There are such things as best and worst companies when it comes to computer systems, and many companies, even large businesses, have chosen or turned to a Windows system over a competitor. One of the most famous and often used names when it comes to data base systems is the Oracle Corporation, so it is no wonder that much of the world depends upon Oracle systems for tasks such as searching, sorting, security and other components of data base systems. As a result, there are

## What's New in the DBxtra?
