1-Touch Photo Image Mydia Maker 6.0 A: Hello and welcome to Photo-SE! I'm looking at your project list; it seems like you are looking to make some marks on vinyl stickers. That would involve vinyl-cutting and vinyl-cutting is beyond the scope of PhotoSE. However, I do know of someone else here who has experience with laser cutting plastic stickers with useful images or text. Please read through the comments, they contain valuable information. This comment might be of particular interest: Another option (if you are prepared to pay) is to use Vistamaster's Vinyl Stampers (see the listing in the comments section), but I would recommend re-visiting PhotoSE before committing money to this: Are you planning to use vinyl? — Magic Markers or vinyl stickers? If you are just interested in a personal project, I recommend the image-processing-utility Imagemagick. It's very easy to use and has quite a lot of features, including much more than you need. Have a look at the documentation to see what options you have. If you want a more 'professional' utility, which is my guess, I'd recommend ImageMagick. It is more powerful than Imagemagick, but also very feature-rich. I hope my answers were helpful, and I wish you the best of luck with your project! PS. Since it is your first post, I assume that you are new to Photo-SE. By the way, welcome to us! We appreciate new users who contribute and make this community better. Q: How to parse JSON in Java I have JSON like following [{ "id":1, "creation_date":"2017-10-05T08:01:55+0000", "categories": [{ "id":1, "name":"name of category 1", "color":null, "position":1
