He doesn't say that he didn't want to, but he could have just said that and saved both of us a lot of time. any reason he couldn't just say that? A: The most reasonable interpretation is that he wanted to get the update to work. He's

been taking a "wait and see" approach in the hopes that it would help. In my opinion, he could simply have said that, but he likely felt he had been clear and direct, and wanted to ensure that he wasn't misinterpreted. In short: there is no mistake. An overview of evidence-based prevention and intervention for autism spectrum disorders and social communication disabilities in preschool children. Autism spectrum disorders (ASD) and social communication disabilities (SCD) are significant and increasing public health concerns. In the absence of an understanding of risk factors, prevention is largely a reactive, and at times futile, process, but the availability of evidence-based (EB) interventions offers a promising avenue for early intervention. The purpose of this review is to give a comprehensive overview of the

range of evidence that supports the efficacy of EB interventions for ASD and SCD in preschool children. Studies were identified by reviewing the literature on a range of possible interventions for ASD and SCD and subsequently through expert consultation and analysis of the available evidence. A total of 32 studies fulfilled inclusion criteria for review. The most robust evidence was for behavior analytic approaches, and for PDD-NOS. Less strong evidence was found for groups, parent education, and a recent innovation - preprogrammed classroom curricula. The available evidence is not strong for any intervention, but it does provide support for a number of approaches. Further research with rigorous experimental methods is needed to more effectively address the evidence base and improve the efficacy of

EB interventions. Robert Bagnell Robert Bagnell (21 August 1901 – 28 September 1980) was a Canadian sports shooter. He competed in the 50 metre pistol event at the 1928 Summer Olympics. References
