The main window shows the elements that compose the skin, for example the buttons, playlists, pictures, etc. The toolbar allows you to organize the elements in a visual way

System Requirements:

When using the game with other Mac users, you should use the latest version of Metal, including Metal 2.0. Currently, there are no plans to support Windows, and Apple's Metal libraries are currently not available on Windows. You can test the game on Mac using the Metal Developer Tools. Linux: The game is designed for running on Mac and Windows platforms, but it currently lacks graphics optimization for Linux. Testing on Linux requires a graphics card with an Nvidia or AMD VDPAU
