**PassKeeper Download [Win/Mac] (2022)**

---

## PassKeeper

PassKeeper is a small software utility built specifically for storing IDs and passwords into a secure environment. With this app you don't need to remember the passwords and names of your accounts whenever you want to access multiple websites. It sports a simplistic interface that can be mastered even by less experienced users. Basically, it's very easy to work with this tool because the developer didn't include any configuration settings. You can add as many accounts as you want provided that you have specified a user ID, password, site address and an e-mail. It is also possible to enter a default user ID. The app displays the websites in the main window and you can paste the data to the Clipboard. Unfortunately, PassKeeper is only able to store the ID and passwords but cannot generate a master password that could make the entire process easier and faster. This is a simple-to-use software solution and it doesn't come packed with advanced features. It simply stores IDs and passwords into a single place and also offers direct access to the selected website with just a few clicks. The program works fast and no errors showed up during our testing. All things considered, PassKeeper is a small but efficient application that can save your user IDs and passwords in a single place which is protected from unauthorized viewing. Thanks to its overall simplicity and clean layout, it can be used by both beginners and experts. Although it cannot be considered the most powerful tool from its category, it does what it says and it's also light on your system resources. Known Issues: Some website addresses have been removed as they were of low quality and users reported that they were unable to open the websites. 4.64 Apr 09, 2018 May update. May update. 4.64 Apr 09, 2018 May update. May update. 4.63 Feb 22, 2018 We've fixed a number of issues and updated the software to be more stable. Please install this update if you want to use the application at its full potential. 4.63 Feb 22, 2018 We've fixed a number of issues and updated the software to be more stable.
