Array.prototype.includes() causes Uncaught TypeError: Cannot read property 'includes' of undefined Array.prototype.includes() causes the following error: Uncaught TypeError: Cannot read property 'includes' of undefined Am I doing something wrong here?

```
console.log(this.options.rooms.includes(rooms));
```

A: If you want to check if the array include the array you can use `findIndex()` and `array.includes()` is used to check if the object contains the element in the array.

```
this.options.rooms.findIndex(function(e) {  
  return e.id === rooms.id; }) > -1; If you use  
array.includes() and you are trying to check in

The youngest of the three originals, the '67 was built in the first year of Philc's partnership with Jim Hall, the most successful one being the '68 in which he first used the Gibson thinline necks. This neck style was a tremendous success, and it's little wonder. Like any fine athlete, it's easy to forget that Jim had been a top-flight player. His popularity can be traced to his being one of the first to fall in love with the guitar, and no one has done more to make them popular than he has. Jim Hall got his first Fender Stratocaster in 1959 at the age of 18. He then

---

switched to Gibson in 1963. The first Gibson Stratocaster he owned was a standard cutaway model and was given to him as a gift by his friend and fellow guitarist Gene Parsons, who is also a member of the Founders of Rock. This Stratocaster was a one of a kind prototype model and was the first to feature a sophisticated electronic tremolo. The '64 was not available in the US, and so the next year he had a Gibson Les Paul Custom and two '65 Spanish American National models in the catalog. I have a few of these first generation thinline models from the 1960s as well as the modified 1965 model. They are a great player's instrument. The original model has a bridge pickup and also a switch for the middle pickup. I've heard the original sounds of these guitars and they are a joy to play. Nice collection, I just love seeing the guitars in the hands of some of the first guys to own them. They were the first electric guitars that sounded like a solid bodied guitar, in my opinion. And with these coming out in the 60's they sounded a lot different from the 60's

amps (which were Fender, Vox, and Ibanez) which sounded nothing like them. I always liked the thinner neck, but it must have been a pain in the rear to play, as I seem to recall these guitars in the hands of players who were
