ID Photos Pro is a professional software utility that allows you to create professional ID documents, such as visas, ID cards and passports, that meet the current international standards and regulations. The application is specifically designed to create a set of passport-quality images of yourself or your clients using their facial features for a better and more memorable picture. Once you have set the region of the country you are using, you can start creating an ID photo of yourself or your client. You can use any of the available samples to get the desired result. ID Photos Pro makes it easier to process your facial features using its powerful face recognition algorithm that automatically detects the face of a person and its biometric features. To make sure that you are providing a passport-quality ID photo, you can easily adjust color, brightness, contrast, sharpness, gamma and more. All of these adjustments are made based on your previous settings. ID Photos Pro comes equipped with a wide range of custom functions that allow you to improve your images in terms of aesthetics, lighting, exposure, exposure level, colors and more. ID Photos Pro has a built-in batch editor that allows you to import multiple pictures into the application at once. If your picture does not meet the predefined standard requirements, you can easily reposition the eyes and apply picture rotation corrections in order to align the face perfectly. This procedure might take a while for inexperienced users. ID Photos Pro's photo editor also provides a set of tools that allow you to adjust colors as to perfectly reproduce skin tones, change saturation, brightness, gamma, sharpness and contrast levels, as well as take advantage of the powerful photo retouch function. ID Photos Pro's powerful photo editor also allows you to export the processed images to a file, burn it on a disc, print it or send it by email to a client. Overall, ID Photos Pro is an efficient, fast and user-friendly software utility that meets the needs of busy professionals or those who need to create professional ID documents, such as a passport. CuteFace Grabber Pro is a handy software application that makes it much easier to crop your photos into different sizes, apply background images or simply remove background from the photo to make it even more attractive. Once you have opened the program, CuteFace Grabber Pro allows you to select a number of photos that you want to work on and then you will be able to crop and adjust their size, as well as choose from a wide range of useful background pictures. Moreover,

===== An application that provides you with professional tools to process images for passports, visas and various types of ID cards in order to meet the international requirements and regulations of most countries. Friendly and intuitive layout The interface of the application is user-friendly and easy to understand mainly because it is based on a step-by-step guide that walks you through all of the application's features. Once you open the application, you can select the country and the type of ID form you want to create, then you can load a photo of yourself or the person you want to create the ID card for. Depending on which country you choose, more ID photo samples are available. If you frequently use some of them, you have the possibility to add them to your favorites list for easy access and manipulation. Powerful face recognition algorithm IdPhotos Pro comes equipped with an advanced face recognition algorithm that automatically detects the face of a person and its biometric features. For situations when your photo does not meet the predefined standard requirements, you have the possibility to reposition the eyes and apply picture rotation corrections in order to align the face perfectly. This procedure might take a while for inexperienced users, otherwise if the aforementioned adjustments are not required, the process takes only a few seconds. Adjust colors and improve image quality IdPhotos Pro features a set of tools that allow you to adjust colors as to perfectly reproduce skin tones, change saturation, brightness, gamma, sharpness and contrast levels, as well as take advantage of the powerful photo retouch function. Furthermore, you can export the processed image to a file, burn it on a disc, print it or send it by email to a client. Professional ID photo editor To sum it up, IdPhotos Pro is a powerful software utility that aims to offer you the means to create professional ID documents, such as visas, ID cards and passports, that respect the current international standards and regulations. Additionally, the application features a comprehensive user manual and a few online video tutorials that help you understand the program's functionality and features.
