FoopChat Client is freeware. It's a standalone application which runs on Windows 98/Me/2000/XP/2003/Vista/7/8/8.1. The application supports Internet Explorer, Netscape, Mozilla, and Firefox. FoopChat Client is a free download. You don't need to pay any money to use it. FoopChat Client is user-friendly and easy to use. The application is compatible with Windows and the majority of the supported browsers. Once you install FoopChat Client, the application is active on the system tray. When another user connects, you'll see a notification bubble on your screen. To turn off notifications, go to the main menu, and select "Tools | Preferences...". Configure your account and then select "Internet Accounts" from the main menu. Go to the Account Details page, and select "Personal Settings". There you can change your status, add friends, and see your friends list. If you have any questions, support is available at our Support page. If you are having trouble, then send a detailed message to our support email address. If you don't receive a response to your message, then try contacting us via the Contact Us page. Read more info about the application's features and other details on our About page. FoopChat Client homepage: How to install and run FoopChat Client: Copy the.exe file to a temporary folder. Right-click the file and choose "Run As Administrator". From the File Explorer, double-click "foopchatclient.exe". (If you are using Windows 7/Vista, use the Open File dialog box to navigate to the program's location and select the.exe file. This option is available under the "Open with" tab of the Advanced Sharing Options dialog box.) The software will run and you can uninstall it from the same dialog box. Alternatively, to install FoopChat Client, you can uninstall FoopChat Server from the "Add or Remove Programs" menu. There will be a prompt when this is done. Select "OK" to install FoopChat Client or "Cancel" to abort the installation. The server installer must be installed separately. The server installer will be downloaded from our site. From the File Explorer, double-click the server installer file (foopchat.ms

#### What's New in the FoopChat Client?

FoopChat Client is an Internet-based application, allowing people to chat privately and securely with each other.
