To evaluate the correlation of morphometric changes of peripheral blood mononuclear cells and severity of acute graft-versus-host disease (aGVHD) in patients with hematopoietic stem cell transplantation (HSCT). Peripheral blood mononuclear cells were collected from 20 aGVHD patients and 16 healthy controls, and the morphometric analysis was performed by flow cytometry. The percentages of lymphocytes and monocytes in peripheral blood were decreased significantly in the patients with aGVHD ($P<0.05$). The percentage of natural killer cells in peripheral blood mononuclear cells increased significantly in acute phase of aGVHD and decreased in the remission phase, but the difference was not significant ($P>0.05$). The percentages of B lymphocytes and monocytes in peripheral blood mononuclear cells were also decreased significantly in the acute phase of aGVHD, but in the remission phase there was no significant difference ($P>0.05$). There was no

significant difference in the percentages of B lymphocytes and monocytes in peripheral blood mononuclear cells between the patients and the healthy controls ($P > 0.05$). The percentages of both B lymphocytes and monocytes in peripheral blood mononuclear cells decreased significantly in the acute phase of aGVHD, which is probably related to the pathogenesis of aGVHD.

Q: How to dynamically call JS function defined in html file

I have an html file, let's call it main.html. In the main.html file, I define a function, let's call it foo, and I'd like to call that function from another HTML file, let's call it called _from_main.html

In my main.html, I'd like to be able to do: `foo();`
