### Deliver Us The Moon: Fortuna Apk LINK Download

The lunar colony of Fortuna relies on a precious natural resource to survive. In this near future, the Earth has been depleted of its native resource. As a direct result, the air is not breathable, the oceans are dying, and the temperature of the planet is on the rise. Jason Stone is on a mission to establish a new settlement on the moon that will provide humankind with a vital natural resource. The burden of ensuring that this planet survives is shared between an elite crew of Earth's best and brightest. In an effort to ease their conscience and sense of responsibility, the surviving members of humanity have also begun terraforming the moon, which presents a new problem: the potential for catastrophe. The discovery of the cold-blooded menace on the moon called the 'Eyeless' have fueled a race to find a solution as the settlement of Fortuna collapses. But in order to survive, the crew must return and conquer the moon, and now they're rushing to do so before the Eyeless can exterminate them all. Which is why they call upon you: the last person on Earth still alive, Jason Stone. It's up to you to try and save the human race, and humanity might just thank you for it. What are you waiting for? Join the crew of the Solar Horizon, and in the process of saving Earth, you will earn the world. Since we are a small team, we have just created this game for fun, but we hope that it can be developed as a fun, yet at the same time realistic game for you in the near future. This game may contain ads because we spend a lot of resources to develop it. We know that this may be a problem for you, so it might be best if you turn off the ads. If you turn off the ads in an ad-free version, you can support us as well. Love Fighting Games? Please consider liking us on Facebook or following us on Twitter!
