Mine

NitroDesigner Pro is a professional graphic editor software that provides powerful image manipulation tools that can help to convert, edit and manipulate images, such as drawing, colorizing, selecting, cut, copy, resize, rotate, edit, watermark, merge, print, resize, rotate and more. Some of the important features are: - Can you design beautiful graphics? Of course. Just drag-and-drop your fingers over a blank canvas. - Know your work can be printed? Just save your design on the clipboard. You no longer need to edit images again after printing. - Apply your design successfully. Drag a design to your canvas, or adjust its position. - Cut and paste the design. That is, you can copy, move and paste any design. - Want to hide an element of the image? Just use the "Hide Element" function or set a key frame point. - Want to be the master of Photoshop? Just use the unique programming tools. These powerful functions are gathered together on NitroDesigner to make you a creative designer. Schedule to shutdown For those who often work at night, are not easily disturbed by noisy tasks, or those who cannot work in the office because of high-pressure jobs, this utility will really help you out. Here is a list of features of this software: - Allow computer to shut down at a specified time. - Allow computer to shut down after a specified time. - Allow computer to shutdown after a specified time, but with a different user. - Allow computer to shut down after a specified time, but in a different location. - Allow computer to turn off its monitor after a specified time. - Allow computer to put to sleep for a specified time. - Allow computer to put to sleep for a specified time, but with a different user. - Allow computer to put to sleep for a specified time, but in a different location. - Allow computer to put to sleep after a specified time, but with a different user. - Allow computer to turn off its monitor after a specified time. - Allow computer to turn off its monitor after a specified time, but in a different location. - Allow computer to turn off its monitor after a specified time, but in a different user. - Allow computer to turn off its monitor after a specified time, but in a different location. - Allow computer to put to sleep after a specified time, but

Mine

- 3 kinds of scheduled modes: - Timer: Allow you to set the duration of the scheduled time and then the computer will be shut down after that time has passed. - On/Off: Schedule the computer to turn on and turn off at your specified time. - Stealth: Allow the computer to enter standby mode in the background while you are working. Mine will give you the option to cancel the scheduled wake up time when you are working. This will avoid waking you up when you're working. - Preset mode can be used in Timer mode or Stealth mode. Once set, you can change the schedule of the mode from your shortcut menu. - You can set 2 kinds of methods to wakeup your computer: - One is a sound method and the other is a wallpaper switch. - From your shortcut menu, you can set the music or display the snapshot as your computer wakes up. - When the scheduled time has passed, Mine will shut down the computer, and it will show the shutdown dialog in the center of the desktop and call the "Wake up" dialog at the same time. You can enable or disable Mine from your taskbar icon. - When you go to shutdown the computer, you can choose between shutdown and standby mode. - Display: - The brightness of the display will be adjusted according to the current temperature of the system. - "Brightness" will not be affected when the display is locked. This option is only useful when you are displaying the schedule in the taskbar or clock. - "Hide the taskbar at shutdown" will hide your taskbar and only show the clock when the computer is shutting down. Version 1.0: - Simple to use and user-friendly interface, it is fun to use - 3 kinds of modes (Timer, On/off, Stealth) - With preset mode, you can set the shutdown time and standby time by your own - Have an option for shutdown or standby mode when the time is up, all you have to do is click the "Minimized to Tray" icon and it will automatically shutdown after you set the shutdown time - When you wake up your computer, you will find out a pop-up screen that shows you "The time has passed, are you going to wakeup your computer?" - If you press "yes" at this time, your computer will shut down - If you press "No", it will go back to b7e8fdf5c8

Mine Free Download
