"We know players want to perform like the real-life stars of the game," said Tony Seward, Executive Producer of the FIFA series. "This technology empowers them to be a part of every kick, pass and dribble from the first minute to the last." The technology has been installed in over 30 FIFA soccer stadiums around the world, capturing over 200,000 player movements. FIFA players have a demonstration version of the technology running on the PC, PS4, and Xbox One on which they can experience the comprehensive player animation system and video tutorials on how to enhance their skills. Fans on the digital platforms can follow the new movements of the FIFA players in real time and share their player-generated content. The technology also features Exocollision 2.0, a new physics system that enables players to connect their movements with their teammates and opponents. A key component of Exocollision 2.0 is Natural Player Motion, a new movement engine that allows for more realistic and organic player performances. Natural Player Motion enables players to shoot with the correct force, bend the ball with the correct trajectory, and move with the correct angle of attack. On the PC, Exocollision 2.0 uses 2K by 2K animations that have a 98% match with real players. Players can also influence their teammates to create fluid, tactical movement and deception. Tackle Impact & Interception, a new system to determine and estimate the force, energy, and direction of head to head contact in all tackle situations. Players with the ball will be subjected to more collisions than those without. The default impact force is higher for intelligent players with the ball. FIFA Ultimate Team has been completely reworked for FIFA 22. Your career will be more rewarding than ever before thanks to FUT Champions, which gives you exclusive access to the stars and legends of the game like Ronaldo, Messi, Xavi, Robin van Persie, Wayne Rooney, and Luis Suarez in your FIFA Ultimate Team. The way players behave, train, and grow within their clubs has been improved to create more realistic player interactions. Fans around the world will follow their favorite players, clubs, and rivalries in the ultimate football competition, called The Journey. New Attitude Adjustment System allows you to toggle fine adjustments to player behavior, to personalize player reactions to everything from shots taken to off-the-ball challenges. FIFA 22 introduces a new Defensive

the world's greatest video game. For 25 years, FIFA has dominated the football game genre, building on the immensely popular FM soundtrack series to create the complete experience. FIFA is the world's greatest football video game. For 25 years, FIFA dominated the football video game genre, building on the hugely successful FM soundtrack series to create the complete experience. All the Ways you can show Off! FIFA continues the theme of intense realism. The innovative 'Real Vision AI' engine brings players into view on the pitch just as it does in real life, then uses the same 3-D technology to 'fill in' the rest of the stadium. Enhanced lighting, weather and the ability to change camera angles create a more authentic experience. The changes to FIFA aim to bring your game more in line with the real thing, with 'Balance of Play' the most obvious. With FIFA's 'pitch-side AI' and updated goal celebration system, long touches as a forward squirts the ball towards goal or a goalkeeper saves a shot, change the rhythm of the game. The same thing happens when you miss a shot, the kick was going too high or the goalkeeper's hand is out. Your opponent runs you enter your next attack, making for more fluid, dynamic gameplay. There are many ways to improve your game play, choose the one that suits you and play like a pro. There are many ways to improve your game play, choose the one that suits you and play like a pro. New Shots Passionate fans have been calling for longer shots, and FIFA has answered. Now, you'll see when defenders are getting into position to deny a shot. New precision passes have a new dimension, as you and your team-mates pass the ball with aim passes and chip passes. Precision passes have a new dimension, as you and your team-mates pass the ball diagonally, aim passes and chip passes. New Attacking Possession play is at the heart of the game, so you'll need to handle the ball competently in order to set up your team's attacks. However, you can also work around a defender with a cunning flick-a
