The seascape changes continually. Even if you turn off your computer, the seascape will still be constantly changing! All of the views you have seen in real life are in this screensaver. You can make the seascape change every hour and/or every second. (60 h / s) You can change the color of the sky with the color buttons located at the bottom of the screen. The bottom of the screen also serves to display the weather forecast in a nice animated rainforecast.
